

MET/CAL® Plus - Report Writing Course profile

A 3 day hands on course in which you will learn MET/CAL® Plus property management software for use on stand-alone PC compatible computers or in a network environment. You will learn how to follow and manage the data flow within the MET/CAL® Plus database. You will also learn how to provide reports and how to create a certificate of results.

Topics include:

- Database structure
- Customisation
- Validation and merge data
- Creating a simple report, using formatting, sorting and data fields
- Report writing using formulas
- Adding a report to MET/CAL® Plus
- Use of the advanced formula editing facility

Who should attend?

This course is ideal for candidates who are directly involved with inventory management and workload planning for cal labs. They will have a good understanding of MET/BASE® Plus and have the need to generate reports and calibration certificates.

Prerequisites

Participants should have a basic understanding of practical applications. Experience in computer operation or automation in the Microsoft Windows® environment is a requirement.

What's included?

All courses are arranged on a fully inclusive package to include accommodation with a meal allowance, local transport, course notes and refreshments.
