

The title 'Temperature Metrology Course profile' is centered in a bold, black, sans-serif font within a yellow horizontal banner that spans the width of the page.The background of the page is a dark green, textured surface with a repeating geometric pattern. Numerous small, white calibration equipment units are arranged in a vertical column on the left side, appearing to be mounted on the wall. The units vary in size and have different display screens and buttons.

A 3 day hands on workshop provides an intermediate course in practical skills for comparison calibration of thermistors, RTDs, Thermocouples and other thermometers.

Topics include:

- ITS-90 scales
- Calibration techniques
- Heat sources
- Readouts
- Optimising you calibrations
- Maintaining your standards
- Compliance Issues
- Controversies

Who should attend?

Those responsible for performing accurate temperature calibrations who are looking to lower measurement uncertainties through comparison techniques.

Prerequisites

Some experience in probe calibration is required.

What's included?

All courses are arranged on a fully inclusive package to include accommodation with a meal allowance, local transport, course notes and refreshments.
