

The title 'Industrial Temperature Calibration Course profile' is centered in a yellow banner. The background of the entire page features a green, geometric pattern of overlapping squares and rectangles, with several digital multimeters and other electronic devices scattered across it.

## Industrial Temperature Calibration Course profile

A 3 day hands on workshop provides a course in practical skills for calibration of thermistors, RTDs, Thermocouples and other thermometers in the industrial environmental.

### Topics include:

- Introduction to Temperature
- Thermometer Types
- Components of Uncertainty
- Common Calibration Techniques
- Heat Sources
- Readouts
- QA Issues

### Who should attend?

Those responsible for calibrating in-field standards.

### Prerequisites

Some experience in sensor calibrations required.

### What's included?

All courses are arranged on a fully inclusive package to include accommodation with a meal allowance, local transport, course notes and refreshments.
